**Subject:** Now available on CD, 2005 product catalog provides full range of information on Special-Lite entrance system products

Special-Lite's 2005 product catalog is now available on CD giving architects, designers, contractors, building owners and maintenance directors the complete range of information needed to design, specify, and order the company's heavy-duty commercial entrance system products. Based on Special-Lite's print catalog, the Windows-based CD provides: exportable CAD drawings in AutoCAD® R12 DWG format; product details, brochures, order forms, and miscellaneous information in Acrobat® Reader® pdf files, and guide specifications in Microsoft® Word®. Adobe® Acrobat® Reader® 5.0 is provided on the CD for installation. The CD includes extensive color photo gallery of the company's product lines in an extensive array of installation environments.

-more-

In the General Information section, documentation is provided that covers color selections; product test results; order forms for literature, samples, and products; and miscellaneous technical information on warranties, product training, door handing, and cleaning instructions.

The Door section includes in-depth information on Special-Lite's four door product lines—monumental, aluminum flush, fiberglass reinforced polyester (FRP) flush, and acrylic-modified polyester (AMP) flush, as well as the company's door hardware and vision lites. The CD allows users to access product literature for each product line, specifications, architectural details, and CAD drawings.

The Framing and Panels section details Special-Lite's framing products suitable for new construction and retrofits as well as architectural panels to match their flush doors. Their three types of framing include: tube frames with applied stops for heavy-duty applications; flush glazed tube frames where the aesthetics of slimmer sight lines is more important; and, storefront framing for adjoining glass areas not requiring heavy-duty frames. Product literature, specifications, architectural details, CAD drawings, windload charts, and deadload charts are provided.

### **About Special-Lite**

Special-Lite, Inc. manufactures a complete line of heavy-duty flush, monumental, and colonial-style doors, panels, and framing products. Architects, contractors, and facility managers have relied on Special-Lite since 1971 for complete entrance solutions to schools, offices, churches, restaurant and retail facilities, water and wastewater treatment plants, and other commercial facilities. All Special-Lite doors and frames are custom solutions, made to order. Unique configurations such as arched doors and transoms, odd sizes, unequal pairs, monorail cutouts or Dutch doors are all available. Special-Lite doors and panels are available in a variety of face sheet materials and finishes, plus the company also offers framing, hardware, and vision lite kits to match.
