**Subject:** Updated brochure shows why Special-Lite commercial FRP Flush Doors last longer and cost less over the lifetime of an entrance.

Special-Lite, Inc. recently introduced an updated brochure highlighting their line of heavy-duty Fiberglass Reinforced Polyester (FRP) Flush Doors for commercial entrances. The brochure explains why their doors last longer, require less maintenance, provide lower lifecycle cost, and are more suitable for green construction than wood, metal, and other FRP doors.

Updates to the brochure examine the many ways that Special-Lite FRP Flush Doors contribute to healthier indoor air from installation and throughout their entire lifespan. For instance, the new literature mentions that Special-Lite's FRP Flush Doors recently received GREENGUARD™ Certification for indoor air quality, including the stringent new Children & Schools Standard™. In addition, the FRP doors feature easy-care finishes that eliminate the need for painting and refinishing—reducing health risks as well as maintenance costs.

-more-

The brochure explains that, unlike wood or metal doors, Special-Lite FRP doors do not rust, corrode, crack, split, peel, or rot. In contrast to the FRP used on other doors, Special-Lite's exclusive SpecLite 3<sup>®</sup> FRP face sheets are more resistant to scratches, scuffs, and chemicals. In addition, graffiti is easily removed with non-toxic, water-soluble, biodegradable graffiti cleaners.

Also detailed is the lightweight, yet heavy-duty, design that enables Special-Lite FRP doors to withstand severe use and abuse. The doors are engineered with the structural flexibility necessary to effectively absorb normal and extreme operating forces without fatigue or structural degradation over time. The lightness of the door, in comparison with heavy metal and wood doors, reduces wear and tear on hardware and framing resulting in extended entrance system life.

### **About Special-Lite, Inc.**

Based in Decatur, Michigan, Special-Lite manufactures complete entrance systems consisting of flush, monumental, colonial doors, panels and framing for new construction and replacement installations in educational, commercial, institutional, industrial and municipal applications. The company was founded in 1971 and pioneered the use of fiberglass reinforced polyester (FRP) material for door skins in the early 1980's. Today, Special-Lite is the largest volume producer of FRP doors in the U.S. What's more, Special-Lite's entrance products are the *first and only* to earn GREENGUARD Indoor Air Quality Certification<sup>®</sup>, including the stringent new Children & Schools Standard<sup>™</sup>.

For more information about Special-Lite's FRP doors and a free copy of the FRP Flush Doors brochure, contact Special-Lite, Inc., P.O. Box 6, Decatur, MI 49045. Or call 800-821-6531, fax 800-423-7610, or visit [www.special-lite.com](http://www.special-lite.com).

The GREENGUARD INDOOR AIR QUALITY CERTIFIED Mark is a registered certification mark used under license through the GREENGUARD Environmental Institute.
