Subject: Brochure Highlights Attributes that Make Special-Lite Entrance Products Ideal for Green Construction

This new brochure examines the top six reasons Special-Lite entrance products are the more sustainable choice for green construction when compared to hollow metal, wood, or other fiberglass reinforced polyester (FRP) doors. These advantages include better indoor air quality (IAQ), longer service life, and reduced maintenance and operating costs.

The brochure reviews the many ways that Special-Lite products contribute to healthier indoor air from installation and throughout their entire lifespan. The fact that Special-Lite products have been recognized with GREENGUARD Certification, including the stringent new Children & Schools Standard™, provides independent assurance of low emission performance.

-more-

What's more, Special-Lite products are factory finished, so they don't need to be painted at installation. The durability of these finishes eliminates regular refinishing, thus reducing airborne particulates and potentially dangerous fumes, as well as maintenance costs. Plus, their products are easily cleaned using non-toxic, water-soluble, biodegradable green cleaners—even for tough stains like graffiti.

In addition, the brochure explains how their unique design, materials used, and durable construction also extends the life of the entire entrance system, provides better thermal performance, and reduces lifecycle cost.

About Special-Lite, Inc.

Based in Decatur, Michigan, Special-Lite manufactures complete entrance systems consisting of flush, monumental, colonial doors, panels and framing for new construction and replacement installations in educational, commercial, institutional, industrial and municipal applications. The company was founded in 1971 and pioneered the use of fiberglass reinforced polyester (FRP) material for door skins in the early 1980's, and today is the largest volume producer of FRP doors in the U.S. Special-Lite's entrance products are the *first and only* to earn GREENGUARD Indoor Air Quality Certification[®], including the stringent new Children & Schools Standard[™].
