

Smooth AMP Colonial Door

Introducing the Special-Lite® Smooth Colonial Door

Enjoy the classic styling of a traditional colonial wood door, without the expensive upkeep of real wood, with the new Special-Lite® SL-18S Smooth AMP Colonial Door. Our popular 6-panel colonial door, the SL-18, is now available with a smooth surfaced face sheet that combines the aesthetics of traditional styling with the performance, durability and reduced maintenance made possible by modern engineering and materials.

The SL-18S is available in custom sizes from a minimum of 36" x 80" to a maximum size of 42" x 88", and can be painted in any of our 20 established paint colors, or any custom color. The SL-18S is not available in wood stain finishes. Smooth colonial AMP face sheets can also be fabricated into 1-3/4" panels for side lites and transoms, subject to certain size and configuration restrictions. Contact Special-Lite engineering for details.

The new Smooth Colonial Door is constructed exactly the same as the SL-18, just without the wood grain texture. It is also backed by the same Limited Lifetime warranty as all Special-Lite® Flush Doors.

Features and Benefits

- Face sheets have a smooth finish and are flush with door edges
- Aluminum door perimeter available in Class I anodizing or Kynar painted finish
- Durable painted face sheets for low maintenance and easy cleaning
- Poured-in-place urethane core for superior thermal and structural performance
- Internal hardware reinforcements for the exact hardware specified
- Corrosion resistant for humid or corrosive locations
- All extrusions are 100% recycled aluminum content (pre-consumer)
- GREENGUARD® Certified to the Children and Schools Standard™
