**Subject:** Special-Lite introduces new Sandstone-Textured FRP with exclusive fine-grained surface.

Special-Lite, Inc. has introduced a new fiberglass reinforced polyester (FRP) face sheet with a more aesthetically-pleasing, fine-grained texture for use on exterior flush doors. The exclusive new “sandstone texture” has a more subtle surface finish and less glossy appearance that makes it better suited to design-driven applications not expected to see deliberate abuse or vandalism. The new texture has been designated as the standard face sheet for the firm’s existing SL-20 FRP Door, where it replaces the smooth face sheets previously provided with that door model.

The new Sandstone-Textured FRP is available in four color-through face sheets – white, beige, light grey and dark bronze, and can also be painted any color. The “Sandstone” face sheets provide a durable finish for low maintenance and easy cleaning.

- more -

The updated Special-Lite® SL-20 Sandstone-Textured FRP Flush Door features the same premium construction as the super-durable SL-17 FRP, and can be custom fabricated in sizes up to 4' by 8'.

Like the SL-17 and the original SL-20, the updated SL-20 Sandstone-Textured FRP door features a poured-in-place urethane core for superior thermal performance and internal hardware reinforcements for the exact hardware specified. It is corrosion resistant for humid or corrosive locations. All extrusions are 100% recycled pre-consumer aluminum content. The door perimeter is available in Class I anodizing or Kynar® painted finish.

For availability please call 1-800-821-6531 or download additional information and order forms at [www.special-lite.com](http://www.special-lite.com).

### **About Special-Lite, Inc.**

Based in Decatur, Michigan, Special-Lite manufactures complete entrance systems consisting of flush, monumental, wood grain and colonial doors, panels and framing for new construction and replacement installations in educational, commercial, institutional, industrial and municipal applications. The company was founded in 1971 and pioneered the use of fiberglass reinforced polyester (FRP) material for door skins in the early 1980s, and today is the largest volume producer of FRP doors in the U.S. Special-Lite® Entrance Products were the first to earn GREENGUARD Indoor Air Quality Certification, including the stringent Children & Schools Standard.
