**Subject:** Special-Lite Introduces New AMP Colonial Door With Smooth Surface

Special-Lite, Inc. now offers a smooth-surfaced colonial acrylic-modified polyester (AMP) flush door ideal for educational, religious, restaurant, retail and municipal facilities which require a more traditionally styled entrance. The new model is based on the company's popular SL-18 AMP Colonial Flush Door, which combines the look and feel of real wood and the advantages of modern engineering and materials for a door durable enough for even high traffic entrances.

The new Special-Lite® SL-18S Smooth AMP Colonial Flush Door features the same six-panel design and precision engineering of the SL-18 door but with a smooth-surfaced face

- more-

sheet instead of a wood grain texture. It is available in custom sizes from a minimum of 30" x 80" to a maximum size of 42" x 88" and can be painted in any of 20 standard paint colors or a custom color. It is not available in wood stain finishes.

Like the SL-18, the new SL-18S AMP Colonial Door features a poured-in-place urethane core for superior thermal performance and internal hardware reinforcements for the exact hardware specified. It is corrosion resistant for humid or corrosive locations. All extrusions are 100% recycled pre-consumer aluminum content and the door perimeter is available in Class I anodizing or Kynar<sup>®</sup> painted finish.

Smooth colonial finishes can also be fabricated into 1 - 3/4" panels for side lites and transoms, subject to certain size and configuration restrictions. For availability please call 1-800-821-6531 or download additional information and order forms at [www.special-lite.com](http://www.special-lite.com).

### **About Special-Lite, Inc.**

Based in Decatur, Michigan, Special-Lite manufactures complete entrance systems consisting of flush, monumental, wood grain doors, colonial doors, panels and framing for new construction and replacement installations in educational, commercial, institutional, industrial and municipal applications. The company was founded in 1971 and pioneered the use of fiberglass reinforced polyester (FRP) material for door skins in the early 1980s, and today is the largest volume producer of FRP doors in the U.S. Special-Lite's entrance products were the first to earn GREENGUARD Indoor Air Quality Certification, including the stringent Children & Schools Standard.
