Gaps under exterior doors waste money and invite pests

Even the smallest gaps under doors can compromise HVAC system efficiency, wasting energy and money. Now there’s a simple and convenient solution—the concealed Adjustable Bottom Brush from Special-Lite. It’s available for all Special-Lite® Doors, either installed in new doors or as an easy to install retrofit kit. Simply adjust its double brushes to compensate for out of position or settling floors, and you’ll not only start saving money, but you’ll improve building occupant comfort, and help keep out unwanted pests.

To learn how easy it is to solve this and other common entrance problems, visit special-lite.com/light.
